In this world of political uncertainty, we provide the confidence and peace of mind necessary for businesses to survive and thrive through difficult times.

We understand this environment and have the knowledge and expertise to provide you with insurance solutions to cover your business for many forms of geopolitical risk, including war, terrorism and government interference.

## **Why buy cover?**

### **To manage risk**

This is an effective way for you to manage the risk of a catastrophic loss resulting from terrorism or breakdown in a local geopolitical situation.

### **To secure your revenue**

Business Interruption cover protects you against loss of earnings or revenue, and the increased cost of conducting business, following physical damage to your property.

### **To protect high-profile property**

Prominent buildings attract specific threats. We cover some of the world's iconic landmarks.

### **To safeguard high-risk assets**

We cover luxury hotels, major shopping and entertainment venues, key industrial facilities and national infrastructures worldwide.

### **To operate in volatile locations**

Many of our clients have assets and investments in areas of political instability or active conflict, with interference by local governments being an ever-present danger.

### **To protect against collateral damage**

If your premises are in a central urban or business area, there is significant risk of damage resulting from an incident in the vicinity, even though your business may not be the primary target.

### **To open up new opportunities**

Having robust cover gives you the flexibility to take advantage of business opportunities.

### **To protect your overseas assets and investments**

In a politically fragile world, this is a positive way to protect against government interference and instability, covering perils such as expropriation, licence cancellation and currency inconvertibility, including when your business is not the primary target.

***We look forward to working with you***
